- Contact Support
- Frequently Asked Questions (FAQs)
- User Guide

Functionalities Behind the Login

When an entrepreneur successfully logs in, the system should:

- Authenticate the user's credentials.
- Verify that the account is active and approved (where applicable).
- Check whether the email address has been verified.
- Determine the entrepreneur's role (Applicant, Incubatee, Accelerator Participant, Alumni, etc.) and incubation/acceleration programs manager role.
- Redirect the user to the correct dashboard based on their role and programme status.
- Record the login date, time, device, and IP address for audit purposes.
- Display notifications and announcements relevant to the entrepreneur.

Validation Rules

Email/Username

- Required
- Must match a registered account.

Password

- Required
- Case-sensitive
- Must match the stored password.

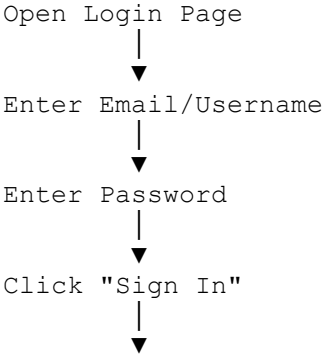

Failed Login Handling

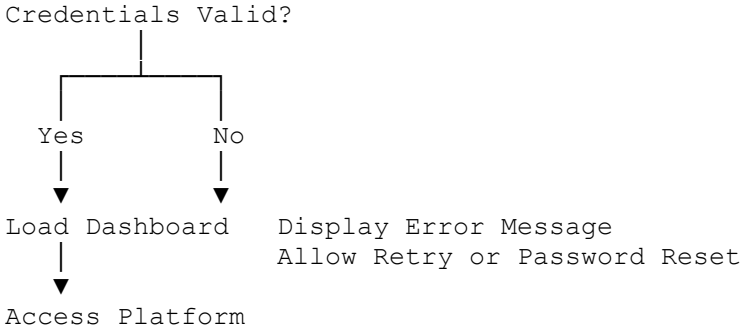

After multiple unsuccessful attempts (e.g., five), temporarily lock the account or require additional verification to improve security.

Optional Security Features

- Multi-Factor Authentication (MFA) via email or authenticator app.
- Device recognition ("This is a trusted daevice").
- Login alerts for new devices or unusual locations.
- Session timeout after a period of inactivity.
