Inside the Incubation Management Page inside Program Setup, do the following

1. Remove Programme Details part

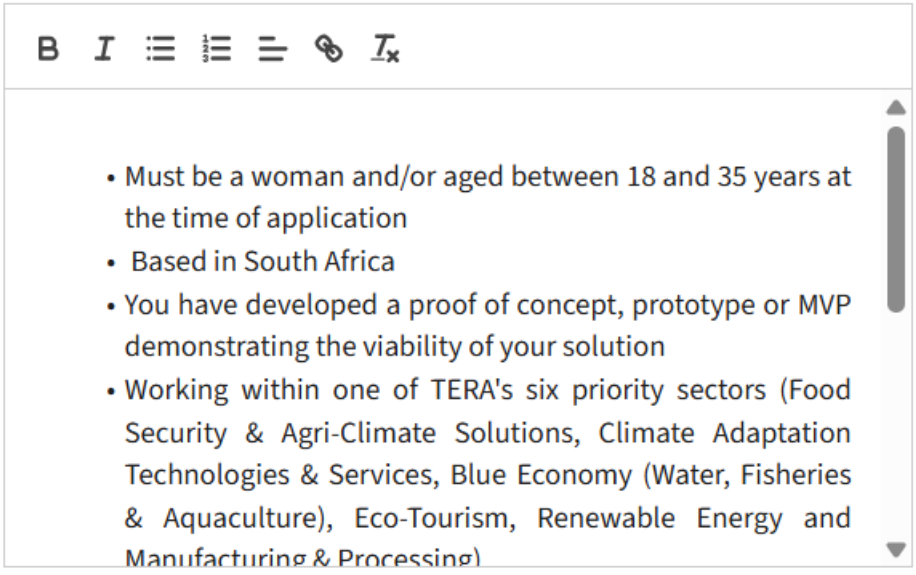

2. Below Add New Program, when use clicks the down-down arrow, the following should be shown here:

3. Inside Application Setup, create the following tabs:

- Overview
- Timeline
- Benefits
- Eligibility

4. Overview Tab should have a text area as shown below and never mind about the text that is seen in it. Maximum number of words should be 40 (put a restriction so that words should not go beyond 40).

5. With reference to the slides at Available Incubation Programs, I want you to adopt a single slide and put it to the right side of Add New Program. Set it as a preview so that when the admin is setting up the particular program, information should be previewed on the preview slide. Below the preview, add save changes button.
