Backend Functionalities

After successful authentication, the system should:

- Verify the mentor's credentials.
- Confirm that the mentor account has been approved and activated.
- Check whether the mentor has completed onboarding or orientation.
- Determine the mentor's programme assignments (Incubation, Acceleration, or both).
- Load mentor permissions and access rights.
- Record login date, time, IP address, and device information for audit purposes.
- Display relevant announcements and notifications.

Validation Rules
