Mentors Landing Page should do much more than list mentors. It should act as a **recruitment, engagement, and information portal** that convinces experienced professionals to become mentors while helping existing mentors access the platform. It should clearly communicate the mentor's role, the value of participating, and provide easy navigation before login.

If the homepage is about **"Why join the entrepreneurship ecosystem?"**, then the Mentors Landing Page is about **"Why become a mentor and how will you contribute?"**

- Contact Us

Some of the Features to Include

To make the page interactive and useful, consider adding:

- **Mentor Matching Preview:** A short explanation or demo of how mentors are matched with startups based on industry, business stage, goals and support needs.
- **Impact Stories:** Interactive cards showing before-and-after outcomes for startups that received mentorship.
- **Mentorship Process Timeline:** A visual timeline explaining onboarding, matching, mentoring, feedback and recognition.
- **Application Progress Tracker:** If someone starts a mentor application without completing it, allow them to return and continue later.

This landing page should position mentoring as a meaningful, structured and rewarding experience while clearly showing how mentors fit into the broader incubation and acceleration ecosystem.
