This dashboard should answer these questions every time an entrepreneur logs in:

Where am I in the incubation programme?

What should I do today?

What learning should I complete next?

What meetings do I have?

What milestones have I achieved?

What support is available to me?

How close am I to graduating from incubation?

Entrepreneur Dashboard (After Login) Target User A startup founder who has been accepted into the Incubation Programme.

Smart AI Recommendations One feature that will differentiate your platform is an AI-powered recommendation panel.

Examples:

Based on your current Validation Stage, we recommend:

Complete Customer Discovery before Friday.

Schedule one additional mentor session this week.

Conduct 12 more customer interviews to reach your milestone.

Review the Market Validation Toolkit.

Attend Thursday's workshop on Value Proposition Design.

This turns the dashboard into a proactive coach rather than just a reporting interface.

Complete Dashboard Structure Dashboard │ ├── Welcome Banner ├── Programme Status ├── Progress Overview ├── Today's Tasks ├── Incubation Roadmap ├── Learning Progress ├── Assigned Mentor ├── Startup Progress ├── Business Goals ├── Upcoming Events ├── Announcements ├── Resources ├── AI Recommendations │ ├── Right Sidebar │ ├── Quick Stats │ ├── Notifications │ ├── Quick Actions │ ├── Community │ └── Business Health Score │ └── Footer Key Design Principle This dashboard should integrate learning management, incubation management, startup management, mentorship, collaboration, and monitoring & evaluation into one experience. Every widget should help the entrepreneur answer: What is my next step toward building a successful, investment-ready business? This approach aligns closely with the vision we've developed for your all-in-one entrepreneurship ecosystem.
