1. Styling – Mentor Registration Page Background

In the **Mentor Registration at account** part, set the background color of the `<main>` element to **`#FCFCFB`**.

- Remove the current patterned background.
- Use a clean solid background color instead.

This will give the page a simpler and more consistent visual appearance.

2. Styling – Mentor Form Text

In the **mentor form**:

- Set all **text labels** to **`#000000`**.
- Set the heading **"Create Your Account"** to **`#000000`**.
- Set the subtext **"Basic account details. Fields marked * are required."** to **`#000000`**.

This improves readability on the lighter form background and keeps the registration page visually consistent.

3. Styling – Registration Form Header and Buttons

In the **Account** section of the registration form:

- Set the **upper part of the form** to have a background color of **`#4C808A`**.
- Set the **Continue** and **Preview** buttons to use **`#3B4167`**.
- Set the **"1 / 13"** progress text to **`#000000`**.

This keeps the registration flow aligned with the platform's color palette while improving contrast and clarity.

4. Repeat the 1, 2 and 3 above for the profile up to review parts or sections inside mentor registration page.
